Re: Specialty Mast Aluminum and Intake/Uptake Welding WARs MOA dated July 30, 2021

Mr. Gauthier:

On June 16, 2022 a letter was sent to you from the Company terminating the WARs associated with the referenced MOA. The original MOA that expired on February 6, 2022 contemplated a meeting between the Parties prior to that date to evaluate whether the WARs have been effective and should be extended. Whether the anticipated review occurred at a separate meeting or at JSRC, it was not reflected in an updated MOA.

Please review and sign the attached MOA continuing the WARs. During this extension period of the proposed MOA, the Company suggests the Parties meet to discuss continuation of the WARs as contemplated by the original MOA.

Sincerely,

Gaetan Breton, Jr.
